

In the near future, Kiwanis will launch Kiwanis Engage. It's a new platform that incorporates the secretary dashboard with new features that will allow clubs to do the following:

- Email members
- Post announcements
- Share an event calendar
- Store club documents
- Manage volunteer sign-ups

These features will help clubs focus on improving the lives of children; and the best thing is that there will be no charge to use Kiwanis Engage.

Additionally, Kiwanis now offers clubs with their own websites at no charge. Kiwanis provides templates and technical infrastructure, and clubs update the content using the popular WordPress platform.

Many clubs subscribe to Portalbuzz for the functionality listed above. However, Portalbuzz has been unable to provide documentation that member data is being handled and stored securely and as a result integration between Portalbuzz and Kiwanis International's database will end later this year. After the agreement between Portalbuzz and Kiwanis ends, clubs may still choose to subscribe to Portalbuzz. However, no membership data will transfer between the platforms. Clubs that continue using Portalbuzz will need to maintain their member listings in both Portalbuzz and Kiwanis Engage — independently.

We hope that your club is as excited as we are about the future of Kiwanis technology. Please feel free to email us at memberservices@kiwanis.org or contact Portalbuzz for more information.
